BOOK REVIEWS

An illustrated dictionary of dermatologic syndromes

Susan Bayliss Mallory Taylor & Francis, 2005, 280 pages, hardback £75.00 ISBN 1-84214-246-1

This dictionary is a superb combination of an A–Z and coloured illustrations and listing of diseases/syndromes according to major dermatological signs. The well-structured approach makes this dictionary a must-have in your office.

Peter CM van de Kerkhof Department of Dermatology University Medical Gentre St Radboud Nijmegen The Netherlands

Atlas of women's dermatology: from infancy to maturity

L. C. Parish, S. Brenner, M. Ramos e Silva and J. L. Parish
Taylor & Francis, 2005, 150 pages, hardback
£75.00
ISBN 1-84214-208-9

This atlas has been created to complement the book *Women's dermatology: from infancy to maturity* by the same authors.

The book provides a wealth of excellent illustrations of many skin conditions in women between infancy and maturity. The illustrations are of excellent quality and may serve as a guide for diagnosis in your own practice. Furthermore, the atlas is of great help in updating your visual memory. Indeed, it is a pleasure to look through the illustrations and enjoy dermatology.

One limitation is the structure of the book. Diseases are grouped in various chapters which show a large overlap of contents. About 30% of the book comprises 'other diseases'. Also, morphology, etiology and the age of patients have complicated the structure of the book.

The atlas is a highly desirable book to have on your shelves.
