## Comment on "Baclofen Withdrawal Following Removal of an Intrathecal Baclofen Pump Despite Oral Baclofen Replacement"

*To the Editor:*

The informative article by Drs. Greenberg and Hendrickson (1) quoted important safety information about intrathecal baclofen withdrawal that appears on the Medtronic, Inc. and US-FDA Web sites.

We would like to inform the readers of the *Journal of Toxicology, Clinical Toxicology* that the sources for the Web-based material are two articles that we published in 2001 and 2002 (1,2). Those articles contain more complete information on the topic, including an analysis of previously unpublished cases.

**Robert J. Coffey, M.D.**
